ABSTRACT

A method for directing a packet to a required bearer of a set
of bearers. The method comprising the steps of:

(a) receiving the packet;

(b) checking if the packet is a fragmented packet and if it
is,

(c) checking if the packet comprises information related to
selection of the correct bearer and if it does,

forwarding the packet to the correct bearer

storing fragmentation related information contained in the
packet

receiving second packet

forwarding said second packet to the correct bearer based on
the fragmentation related information.

and if it does not, storing fragmentation related information
contained in the packet

storing said packet;

receiving another packet containing information related to the
selection of the correct bearer; and

forwarding another packet and the stored packet(s) to the
correct bearer.
